RE: CSO 003

Dear Ken Myers:

Lot Id: 127879

Element Materials Technology – Fort Wayne received 7 sample(s) on 10/6/2022 for the analyses presented in the following report.

In accordance with your instructions, a laboratory of Element Materials Technology Fort Wayne LLC either conducted or subcontracted these analyses. Subcontracted analyses will be identified in an accompanying case narrative and any associated report(s) will be attached in full. Unless otherwise noted in the case narrative, all analyses were conducted using approved methodologies. Reported results relate only to the items tested.

Estimated uncertainty is available upon request. This report shall not be reproduced, except in full, without the written approval of the laboratory.

If you have any questions regarding these test results, please feel free to call.

Sincerely,

A handwritten signature in cursive script that reads 'Nicole Breauchy'.

Comments:

- Oct 10, 2022 - The low level mercury testing was subcontracted to Purves Environmental. Their report is attached in its entirety. (BRL = Below Reporting Limit).
- Oct 14, 2022 - The Available Cyanide testing was subcontracted to Eurofins/Test America Pittsburgh PA. Their report is attached in its entirety.
- Oct 19, 2022 - Sample 127879-5; 120752: The BOD result for sample 127879-5 is an estimate. Dilutions were used that would typically provide results within instrument range for this type of sample, however this sample had a higher concentration than is typical. A smaller sample volume (larger dilution) would have been necessary to produce a result within the instrument range, however the hold time for the BOD test is 48 hours and test results are not available until after the 5 day incubation period.
- Oct 19, 2022 - The dilution water blank for the BOD analysis was outside of acceptance limits. This data is accepted based on acceptable recoveries in additional associated QC.
